DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 and 8-19 are rejected under 35 U.S.C. 102(e) as being anticipated by *Ives et al.*, (US 2004/0041804 A1)

As per claims 1, 4, 8, 11, 14, and 17, *Ives* teaches a computer-readable medium having stored thereon a plurality of sequences of instructions for converting a resolution based on a model generated through statistical processing of multiple images, the plurality of sequences of instructions including sequences of instructions (stored in memory), which, when executed by a processor, cause the processor to perform the steps of:

- receiving an input image having a resolution;
- reducing the resolution of the input image to conform to a first model resolution (two dimension image) of a first prepared model;
- calculating a characteristic parameter (PCA) of the reduced input image; and

Art Unit: 2182

- applying the calculated characteristic parameter to a second prepared model (original 2d image) that has a second model resolution, the second model having higher components than the first model resolution. (Abstract, [0003-0037])

As per claim 2, 9, and 15 /ves teaches preparing a model using standard images.

As per claim 3, 10, and 16, /ves teaches preparing a resolution of the first model through statistical processing.

As per claim 6, 13, and 19, /ves teaches wherein the second model is prepared by converting the first model resolution.

As per claim 5, 12, and 18, /ves teaches wherein the first model represent a matrix of eigen vector values.

Allowable Subject Matter

Claims 7 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2182
